HOW TO USE THIS GUIDE

Listed within are the names of farms throughout the State; where families may either Choose & Cut their own tree or purchase a fresh cut one. Detailed in each listing are phone numbers, directions, species available, approximate number of trees - 5 ft. and up - which are for sale, days and hours open, plus any special marketing techniques. Beside each farm name are listed numbers, which denote other marketing features available or permitted. The KEY to these numbers is located below. Tagging (reserving trees) is permitted on some farms - check KEY. NO AXES or CHAINSAWS ARE ALLOWED. Most farms are only open daytime hours. You should telephone the farm for certainty that trees are still available or to ask any other questions that might make your visit a more enjoyable one.

GROWER'S KEY

- | | |

CHRISTMAS TREE CARE TIPS

- Use a tree stand that fits your tree. Avoid whittling the sides of the trunk down to fit a stand. The outer layers of wood are the most efficient in taking up water and should not be removed.
- Keep your tree away from sources of heat such as fireplaces, heaters, heat vents and direct sunlight.
- Before placing your tree in the tree stand, make a fresh cut to remove about a ½ inch thick disk of wood from the base of the tree trunk. Don't bruise the fresh cut surface or get it dirty.
- Check the tree stand daily to make sure that the water level does not go below the base of the tree.
- Always inspect light sets before placing them on the tree. Replace any worn or frayed light sets.
- Always turn off the Christmas tree lights before leaving the house or going to bed.
- Trees can be temporarily stored for several days in a cool location, out of the sun and wind. Place the freshly cut trunk in a bucket that is kept full of water.
